## Chapter 1

# Mainpage

This is a simple example of a mainpage for a project.

## Chapter 2

# API

### Commenting

- commenting should be done in QT style

```
/*!  
 * this is an example multiline comment  
 *  
 * @return with javadoc style arguments  
 */  
  
//! or a single line comment if you prefer
```

# Chapter 3

## Documentation

DE2Bot

Table	Header
Example	Style

## Chapter 4

# doxygen-demo

example of doxygen usage for my own purposes

ok so this is one of the pages

## Chapter 5

# Class Index

### 5.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">Car</a> . . . . .	<a href="#">13</a>
-------------------------------	--------------------

## Chapter 6

# File Index

### 6.1 File List

Here is a list of all documented files with brief descriptions:

<a href="#">Car.cpp</a>	.....	17
<a href="#">Car.h</a>	.....	17
<a href="#">Main.cpp</a>	.....	17

# Chapter 7

## Class Documentation

### 7.1 Car Class Reference

```
#include <Car.h>
```

#### Public Member Functions

- [Car](#) (string make, string model, int year, int cost)
- string [getMake](#) ()
- string [getModel](#) ()
- int [getYear](#) ()
- int [getCost](#) ()
- bool [highClass](#) ()

#### 7.1.1 Detailed Description

represents a car with an make, model, year, and cost

##### Author

tle753

##### Version

1.0

Definition at line 20 of file Car.h.

#### 7.1.2 Constructor & Destructor Documentation

##### 7.1.2.1 Car()

```
Car::Car (  
    string make,  
    string model,  
    int year,  
    int cost )
```

constructor

**Parameters**

<i>make</i>	the make of the car
<i>model</i>	the model of the car
<i>year</i>	the year the car was made
<i>cost</i>	the cost of the car

Definition at line 20 of file Car.cpp.

```
20                                     {
21     this->make = make;
22     this->model = model;
23     this->year = year;
24     this->cost = cost;
25 }
```

### 7.1.3 Member Function Documentation

#### 7.1.3.1 `getCost()`

```
int Car::getCost ( )
```

returns cost of car

**Returns**

cost of car

Definition at line 59 of file Car.cpp.

```
59                                     {
60     return cost;
61 }
```

#### 7.1.3.2 `getMake()`

```
string Car::getMake ( )
```

returns make of car

**Returns**

make of car

Definition at line 32 of file Car.cpp.

```
32                                     {
33     return make;
34 }
```

### 7.1.3.3 getModel()

```
string Car::getModel ( )
```

returns model of car

#### Returns

model of car

Definition at line 41 of file Car.cpp.

```
41         {  
42     return model;  
43 }
```

### 7.1.3.4 getYear()

```
int Car::getYear ( )
```

returns year car was made

#### Returns

year of car

Definition at line 50 of file Car.cpp.

```
50     {  
51     return year;  
52 }
```

### 7.1.3.5 highClass()

```
bool Car::highClass ( )
```

tells whether or not the car is top quality

#### Returns

whether or not the car is high class

Definition at line 68 of file Car.cpp.

```
68     {  
69     return (cost > 100000);  
70 }
```

The documentation for this class was generated from the following files:

- [Car.h](#)
- [Car.cpp](#)

## Chapter 8

# File Documentation

### 8.1 Car.cpp File Reference

```
#include <string>
#include "Car.h"
```

#### 8.1.1 Detailed Description

contains function definitions for car class

### 8.2 Car.h File Reference

```
#include <string>
```

#### Classes

- class [Car](#)

#### 8.2.1 Detailed Description

contains the header for the car class

### 8.3 Main.cpp File Reference

```
#include <iostream>
#include <string>
#include "Car.h"
```

## Functions

- `int main ()`

### 8.3.1 Detailed Description

contains main function to run entire program

### 8.3.2 Function Documentation

#### 8.3.2.1 main()

```
int main ( )
```

main function that runs the program

#### Returns

the program error code

Definition at line 18 of file Main.cpp.

```
19 {  
20     cout << "Program Starting...\n";  
21  
22     Car mustang("Ford", "Mustang", 2010, 120000);  
23     cout << mustang.highClass() << endl;  
24  
25     cout << "Program End.\n";  
26     return 0;  
27 }
```
